DETAILED ACTION

1. This office action is in response to the amendment filed on October 20, 2003, in which 1-20 are presented for further examination.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-10, drawn to means for loading searchable data into data smart, classified in class 707, subclass 3.

Group II. Claims 11-20, drawn to system for billing data and customer usage data, classified in class 705, subclass 26.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as sub-combination disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. In the instant case, invention I respectively have separate utility such as loading searchable data into data smart, while invention II are useable for billing data and customer usage. See M.P.E.P.

§ 806.05(d).

Serial Number: 09/825,436:

Art Unit: 2172:

4. These inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification. Restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and the search required for Group II is not required for Group I. Restriction for examination purposes as indicated is proper. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as sub-combination disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as loading searchable data into data smart, while invention III is useable for billing data and customer usage. See M.P.E.P. § 806.05(d).

6. These inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification. Restriction for examination purposes as indicated is proper.

7. A telephone call was made to Richard M. Moose (Reg. No. 31,226) on January 5, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2172:

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant also is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
